3. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claims is the inclusion of the limitations including comparing head cells in a first and second buffer, determining their equivalency, and based upon such equivalency forwarding a head cell from either the first or second buffer with a predetermined probability. Further, if the time stamps of the head cells are the same but the type of cell is different, the active cell is given transmission priority over the dummy cell. These limitations are found in all of the independent claims. And, the previously mentioned limitations are not found in the prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
